

I claim:

1. A treatment formula, comprising in combination, the following ingredients on a weight percent basis:
  - 5 Water approximately 71.00 – approximately 93.00;  
Ammonium Lauryl Sulfate approximately 1.00 – approximately 5.00;  
Sodium Laureth Sulfate(and)  
Disodium Oleamide MEA Sulfosuccinate  
(and) Cocamide DEA(and)
  - 10 Cocamidopropyl Betaine approximately 5.00 – approximately 10.00;  
Alkyloxypolyethyleneoxyethanol  
(and) Tall Oil MEA(and)  
Tetrasodium EDTA approximately .50 – approximately 5.00;  
Cocamidopropyl Betaine approximately .10 – approximately 2.00;
  - 15 Propylene Glycol(and) Diazolidinyl Urea  
(and) Methylparaben(and)  
Propylparaben approximately .50 – approximately 1.00;  
Sodium Bisulfate approximately 0.01 – approximately 1.00;  
Tetrasodium EDTA approximately 0.01 – approximately 2.00;
  - 20 Fragrance approximately 0.01 – approximately 1.00;  
Sodium Chloride approximately 0.01 – approximately 1.00; and  
Mixed Proteases approximately 0.01 – approximately 1.00, wherein  
the formula treatment reduces hair loss and extends hair life.
- 25 2. The treatment formula of claim 1, wherein the Mixed Proteases is  
a natural enzyme mixture.

3. The treatment formula of claim 2 wherein the natural enzyme mixture comprises lipase and protease.
4. A method for making the treatment formula of claim 1, comprising the steps of:
  - 5 charging the mixing vessel with water;
  - adding ingredients in the sequence and amounts shown in claim 1;
  - mixing thoroughly after the addition of each ingredient to insure uniformity; and
  - maintaining the mixing temperature between approximately 18°C and approximately 30°C to produce a clear, transparent liquid product that reduces hair loss
  - 10 and extends hair life.
5. A method for using the treatment formula of claim 1 comprising the steps of:
  - a) wetting a scalp and head of hair with warm water;
  - b) applying approximately one teaspoon to approximately one tablespoon of
  - 15 treatment formula to the wet hair and scalp;
  - c) massaging the treatment into the hair and scalp; and
  - d) rinsing the hair and scalp to remove the treatment formula, thereby removing toxins that can cause hair loss.
- 20 6. The method of using the treatment formula of claim 5, further comprising:  
repeating steps a) to d) at least once each day.
7. The method of using the treatment formula of claim 5, further comprising:  
preparing the hair for a treatment selected from the group consisting of: hair
- 25 perms, dyes, conditioning and straightening.

8. The method of using the treatment formula of claim 5, wherein the hair loss is characterized as telogen effluvium.
9. The method of using the treatment formula of claim 8, wherein telogen effluvium  
5 further comprises: a specific form selected from the group consisting of sudden, delayed, chronic and non-chronic.
10. The method of using the treatment formula of claim 5, wherein the hair loss is characterized as androgenetic effluvium.
- 10 11. The method of using the treatment formula of claim 5, on hepatitis patients receiving interferon drug therapy to extend hair life and remove toxins that can cause hair loss.
- 15 12. The method of using the treatment formula of claim 5, on cancer patients receiving chemotherapy drugs to extend hair life and remove toxins that can cause hair loss.
- 20 13. A treatment formula, comprising in combination, the following ingredients:  
a mixture of enzymes;  
ammonium lauryl sulfate;  
sodium laureth sulfate, disodium oleamide MEA sulfosuccinate, cocamide DEA, cocamidopropyl betaine;  
alkyloxypolyethyleneoxyethanol, tall oil MEA, tetrasodium EDTA;  
25 propylene glycol diazolidinyl urea, methylparaben, propylparaben;  
sodium bisulfate; and  
water, wherein the formula is used as a topical application.

14. The treatment formula of claim 13, wherein the mixture of enzymes comprises: lipase and protease.
